-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 25 November 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 2-8 is/are pending in the application.
- 4a) Of the above claim(s) 7 and 8 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 3-6 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

**Priority under 35 U.S.C. §§ 119 and 120**

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 13.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

Art Unit: 2822

## DETAILED ACTION

This Office Action is in response to the Applicant's amendment filed November 25, 2002.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muraoka et al. (5,324,966) in view of Seki (5,025,293) and Baliga (5,396,087).

Muraoka et al. teach a semiconductor component, comprising: a semiconductor body having: first and second main sides; four doped regions with conductivities having alternating signs formed one above another between the first and second main sides; a gate electrode **10** disposed on the first main side; a source contact **9**; a drain contact **1**; one of the four doped regions being a weakly doped first base region **5** with a conductivity type, the second base region **7** having a channel and having the gate electrode for controlling the channel; two remaining regions of the four doped regions being respectively connected to one of the source contact and the drain contact; the source contact being disposed on the first main side; a buffer layer **3** being doped to have the given conductivity type, the buffer layer being disposed between the first base

Art Unit: 2822

region and on of the two remaining regions connected to the drain contact; a further buffer layer **6** being doped to have a given conductivity type and being disposed between the first base region and the second base region; a third region **2** having a conductivity type opposite the given conductivity type and being connected to the drain contact; a fourth region **11** having the given conductivity type and being connected to the second base region; and the source contact being disposed on the first main side and being connected to the fourth region (Figure 1, cols. 7-8, lines 18-68 and 1-59, respectively). However, Muraoka et al. fail to teach a further buffer layer being doped to have a given conductivity type; a second base region extending as far as the first main side and a source contact being connected to a second base region. Seki teaches a further buffer layer **2b** being doped to have the given conductivity type (Figure 1, cols. 3-4, lines 31-68 and 1-68, respectively). Baliga teaches a second base region **19** extending as far as the first main side and a source contact **20** being connected to a second base region (Figure 3, col. 6, lines 18-65). Baliga further teaches a doping of a layer having a magnitude causing the semiconductor component to block in a direction from the drain contact toward the source contact (reverse) in an envisaged range of opposite applied electrical voltages (cols. 2-4, lines 43-51, 14-26 and 42-44, respectively). Since Muraoka et al., Seki and Baliga are from the same field of endeavor (buffered semiconductor components), the purpose disclosed by Seki and Baliga would have been recognized in the pertinent art of Muraoka et al. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the buffered semiconductor component as taught by Muraoka et al.

Art Unit: 2822

by incorporating the further buffer layer as taught by Seki and the reverse blocking as taught by Baliga to provide directional power flow control.

### ***Response to Arguments***

Applicant's arguments with respect to claims 3-6 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art with respects to reverse blocking components:

Han et al. (5,891,776)

Iwamuro (5,614,738)

Ogura et al. (4,866,315)

Pike, Jr. et al. (5,528,058).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2822

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ida M Soward whose telephone number is 703-305-3308. The examiner can normally be reached on Monday - Thursday, 6:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 703-308-4905. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9318 for regular communications and 703-872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
